DATA FINDINGS

Key Insights & Dashboard Drivers

Department Breakdown

R&D accounts for the highest volume of attrition with **133 employees**, followed by **Sales (92)** and **Human Resources (12)**.

Job Role Sensitivity

Sales Representatives lead in turnover at **39.8%**, followed by **Lab Techs (23.9%)** and **HR (23.1%)**, while **Research Directors** have the lowest at **2.5%**.

Overtime & Tenure Dynamics

Overtime employees experience **30.5% attrition** vs **10.4%** for non-overtime. First-year staff face highest tenure risk at **36.4% (<1 year)** and **23.9% (1-2 years)**.

Age & Salary Band Vulnerability

Younger staff in the **18–25 age band (35.0%)** and low-earners in the **<5K salary band (21.8%)** exhibit the highest turnover proportions.

Gender Share & Strategic Target

Attrition consists of **150 Males (63.29%)** and **87 Females (36.71%)**. Target retention initiatives at entry-level roles, <5K salary tier, and overtime workloads.

ACTION PLAN

Targeted Retention Roadmap

01

Overtime Governance

Cap compulsory overtime hours in high-risk roles to mitigate burnout-driven departures, particularly in Sales and R&D operations.

02

Compensation Adjustments

Review pay bands for sub-$5K/month earners to align entry compensation with market rates and reduce early talent attrition.

03

Early-Tenure Onboarding

Implement structured 1–2 year mentorship and career pathing programs to increase retention during critical early tenure periods.
